

LaserCEM®

Multi component gas analyser

- QAL1! Certified according to EN 15267
- Reduced operational costs
- Direct measurement without modifying the sample

Features

- Continuous multigas measurement
- High resolution IR laser technology
- Patented OFCEAS TDL technology
- No moving optical parts
- Suitable for NOx ELV below 35 mg/Nm³
(WI)/50 mg/Nm³ (LCP)
- Direct measurement without modifying the sample
- Patented low pressure sampling system
- Low instrument air consumption

Benefits

- Multicomponent measurement without interferences regardless of the matrix
- Measurement in wet gases
- Zero information contained in the signal (no zero gas required)
- Very fast response time
- Reduced operational costs (low compressed air + low power consumption due to self heated line @ 80 °C)
- High availability of the system
